Senior Backend Developer (.NET) · Azure ·
Microservices · DDD

Available 1 August 2026 · Contract / remote · CET (Urmond, Netherlands)

// PROFILE

Senior backend engineer with 30 years of professional experience, the last 10 in technical lead roles spanning life sciences SaaS, enterprise finance, and government domains. Deep expertise in C# and the .NET ecosystem—from .NET Framework through .NET 9—with a focus on building scalable, maintainable backend services.

Domain-Driven Design, event-driven architecture, and test-first development are my default. I've designed and delivered microservices on Azure (Functions, Service Bus, containers), built complex Web APIs with custom middleware and DI pipelines, and tuned EF Core for high-throughput relational schemas. Every service I own has audit-trail discipline, tenant isolation, and zero-downtime deployment—non-negotiable from day one.

// AI-NATIVE DELIVERY

I've integrated AI-agent workflows into production delivery since 2024—not as an experiment but as a force multiplier. This lets me run multiple parallel tracks without team expansion, eliminate tech debt alongside feature work, and deliver solo on work that normally requires a team.

Reviews and machine-readable styleguides form the guardrails. The value is not in generated output itself but in the operator discipline to validate authorization, audit-trail, and data boundaries on every diff—no black-box trust. Proxify's 1% acceptance rate appeals to me because I hold my work to that same standard.

// WORK EXPERIENCE

// CLUSTER · LIFE SCIENCES HOLDING – three sister organisations under one holding, each with own management, domain, and stakeholders.

Technical Lead · SkinConsult

dec 2021 – aug 2026

Stack: .NET 6/8 · Azure · Blazor · EF Core · SQL Server · DDD · AI-agent workflows

- Tech lead for EU-regulatory SaaS platform (cosmetovigilance); architected modular backend services from legacy monolith to event-driven microservices.
- Designed and built scalable Web APIs with custom middleware, DI pipelines, and comprehensive unit/integration test coverage (xUnit, Moq).
- EF Core performance tuning: migration strategy, complex relational schemas, query optimization, and eager-loading patterns for high-throughput data pipelines.
- Zero-downtime deployments via Azure DevOps; infrastructure as code with Bicep; Azure Service Bus for async event-driven communication.
- Introduced code review standards, peer review culture, and automated quality gates across the team.

Technical Consultant · Allergie Centra Nederland

jun 2023 – aug 2026

Stack: Azure · .NET · Service Bus · GitHub Actions · Cloudflare · Data pipelines

- Azure integrations and automation: custom APIs, data pipelines, document workflows, external data scrapers.
- End-to-end DevOps: Cloudflare edge, GitHub Actions CI/CD, Azure Functions serverless compute.
- Security-first design: tenant isolation, audit trails, authorization boundaries in patient-data context (NEN 7510/7511).

Technical Lead · Dermatologisch Centrum Utrecht

dec 2021 – mei 2023

Stack: .NET · Azure · Background workers · Event pipelines · DevOps

- Cloud-native back-office and domain-specific workflow APIs with async event pipelines and background workers.
- Azure infrastructure end-to-end: App Services, Functions, Service Bus, blob storage, Key Vault.
- Parallel role with SkinConsult under the same holding.

Consultant – Azure Integration Services · Rensa Family Company

may 2021 – nov 2021

Stack: Azure Functions · Service Bus · Integration Services · DevOps

- Enterprise integration via Azure Functions, Service Bus messaging, and Azure Integration Services.
- CI/CD pipelines and deployment strategy for serverless architecture.

Project Development Manager · True People BV, Amersfoort

apr 2019 – nov 2021

Stack: Umbraco · .NET · Scrum

- Managed multiple Umbraco projects; operational management, scrum, team leadership.
- Technical oversight across simultaneous delivery tracks.

// CLUSTER · DETACHING VIA QUINTOR – three assignments 2017–2019, each with its own client and domain.

Technical Team Lead · Belastingdienst (Dutch Tax Authority) may 2018 – mar 2019

Stack: .NET Core · CI/CD · Test Automation · Structured Logging

- Lead architect after initial dashboard assignment.
- Implemented test automation to replace manual regression testing.
- Established ORM, structured logging, and automated deployment standards.

Full Stack .NET Developer · Rabobank

sep 2017 – apr 2018

Stack: .NET MVC · Analysis Services · CI/CD

- Rebuilt financial steering set; replaced database backend with OLAP cube.
- Introduced pull request peer reviews as standard process.

Frontend Developer · Evidos (e-signatures)

jun 2017 – aug 2017

Stack: ASP.NET Core MVC · TypeScript · OpenID Connect

- HTML5 canvas signature positioning; integration with existing e-signature API.
- Authentication via OpenID Connect and OAuth.

Senior Developer & Team Leader · Deltec Software BV, Amersfoort

jan 2010 – may 2017

Stack: C# · CMS · CI/CD · B2B platforms

- Built B2B platforms for GroupAuto Nederland, Quinton Hazell, Motor-Parts.
- Introduced Continuous Integration (Git, Jenkins, MSBuild).
- Business consultancy 2015–2016: POS integration for cloud-based cash register, migration Windows → cloud.

Developer → Senior Developer · Deltec Software & RoutIT (contract)

sep 1996 – jan 2010

Foundation in enterprise software delivery

- 13-year growth from trainee to senior. Legacy → early B2B web platforms.
- Founded RoutIT client portal (1999–2001): first customer support, ticketing, and monitoring systems.

// CORE SKILLS

.NET Ecosystem

.NET 6/8/9, ASP.NET Core Web APIs, Blazor, MAUI, SignalR, Entity Framework Core (performance tuning, migrations, complex schemas)

Microservices & DDD

Domain-Driven Design, event-driven architecture, custom middleware, filter pipelines, dependency injection, CQRS

Azure Cloud

App Services, Functions (serverless), Service Bus, Integration Services, Application Insights, Key Vault, Blob Storage, Aspire, Bicep, containers

Testing & Quality

xUnit / NUnit, Moq, test-first mindset, integration testing, code review standards, automated quality gates

Databases

SQL Server (complex relational schemas, query optimization), Cosmos DB, MongoDB (familiar)

DevOps & CI/CD

Azure DevOps, GitHub Actions, Bicep, Docker, Cloudflare, zero-downtime deployments, infrastructure as code

Languages

C#, TypeScript, JavaScript, Python, SQL, HTML/CSS

Security & Compliance

Tenant isolation, audit-trail implementation, data-boundary discipline, NEN 7510/7511 (healthcare), AVG/GDPR

// CERTIFICATIONS

- AWS Fundamentals: Going Cloud-Native — Coursera (2020)
- Umbraco Certified Professional (2019)
- Python for Everybody Specialization — University of Michigan via Coursera (2018)
- Certified ScrumMaster (CSM) — Scrum Alliance (2018)

// LANGUAGES

- Dutch (native)
- English (C2)
- Spanish (basic)

// COMMUNITY

- HartslagNu — Emergency responder (since 2015)
- VVN Traffic Exam — Volunteer at local primary school (since 2024)
- Scouting Hiawatha — Leader (2012–2020)
